Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

# Application No. Applicant(s) 10/541.372 KELLER, ARNOLD Office Action Summary Examiner Art Unit ANN SCHILLINGER 3774 -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --Period for Reply A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS. WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b). Status 1) Responsive to communication(s) filed on 24 June 2008. 2a) This action is FINAL. 2b) This action is non-final. 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213. Disposition of Claims 4) Claim(s) 1-11 is/are pending in the application. 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration. 5) Claim(s) \_\_\_\_\_ is/are allowed. 6) Claim(s) 1-11 is/are rejected. 7) Claim(s) \_\_\_\_\_ is/are objected to. 8) Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement. Application Papers 9) The specification is objected to by the Examiner. 10) The drawing(s) filed on is/are; a) accepted or b) objected to by the Examiner. Applicant may not request that any objection to the drawing(s) be held in abevance. See 37 CFR 1.85(a). Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d). 11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152. Priority under 35 U.S.C. § 119 12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f). a) All b) Some \* c) None of: Certified copies of the priority documents have been received. 2. Certified copies of the priority documents have been received in Application No. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)). \* See the attached detailed Office action for a list of the certified copies not received.

#### DETAILED ACTION

### Claim Rejections - 35 USC § 112

Claims 1-11 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Lines 13-15 of claim 1 describe the ribs not having an increase in height from the proximal to the distal end relative to a longitudinal axis of the shaft. However, the Applicant has not adequately shown in the specification and the drawings that the ribs do not have an increase in their longitudinal height.

## Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-5 and 7-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bohn (U.S. Pat. No. 5,507,833) in view of Webb, Jr. et al. (U.S. Pat. No. 4,714,470). Bohn discloses the shaft with a tapering, substantially rectangular, core cross-section (please see Figures 5, 6); longitudinal ribs (52) on the lateral and medians sides of the distal portion of the shaft, where the height of the ribs increases continuously relative to the shaft core surface from a proximal to a distal direction, and where the height of the ribs does not increase relative to a longitudinal axis of the shaft (please see Figure 5-9). Bohn does not disclose edge ribs on the

Application/Control Number: 10/541,372

Art Unit: 3774

lateral corners of the shaft's rectangular cross-section. Webb, Jr. et al. teaches hip implant with edge ribs on the lateral corners of the shaft's rectangular cross-section in Figures 1 and 6 and in col. 5, line 63 through col. 4, line 34 for the purpose of providing additional stability to the prosthesis when it is implanted. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made, to use edge ribs on the implant in order to provide additional stability to the prosthesis when it is implanted.

Regarding the claim language discussing the axis ratio and rib heights, it would have been obvious to one having ordinary skill in the art at the time the invention was made to use the claimed values, since it has held that discovering an optimum value of a result effective variable involves only routine skill in the art. *In re Boesch*, 617 F.2d 272, 205 USPO 215 (CCPA 1980).

Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Bohn in view of Webb, Jr. et al., in further view of Blanquaert (U.S. Pat. No. 4,495,664). Bohn, as modified by Webb, Jr. et al., discloses the invention substantially as claimed, however, they do not disclose the ribs having roughened surfaces. Blanquaert teaches a hip prosthesis with roughened ribs in col. 2, lines 3-13 for the purpose of promoting bone regrowth. Therefore it would have been obvious to one of ordinary skill in the art at the time the invention was made, to have roughened surfaces on the ribs in order to promote bone regrowth.

# Response to Arguments

Applicant's arguments with respect to claims 1-11 have been considered but are moot in view of the new ground(s) of rejection. Art Unit: 3774

Conclusion

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to ANN SCHILLINGER whose telephone number is (571)272-

6652. The examiner can normally be reached on Mon. thru Fri. 9 a.m. to 4 p.m..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, David Isabella can be reached on (571) 272-4749. The fax phone number for the

organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would

like assistance from a USPTO Customer Service Representative or access to the automated

information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
